

Microscopic analyses of AMF and Frankia ultrastructure.
Detailed analysis of root hairs and root system architecture.
Use of image analysis systems of root system architecture and root hair.
Soil analysis (pH, N and P analysis, micronutrient analysis with the use of flame spectrometer, soil organic matter)
Descriptions of soil profile.
Analysis of soil structure.
Plant tissue analysis (N, P, and micronutrients).
Use of image analysis systems.
Rhizotron system.
Knowledge of PCR techniques.

Made on a Mac
